

Sr.No.	Start-up Name	company identification Number (CIN)	Incorporation Date	Founder Name	Brief about Technologies/Product working upon (50 words)	TRL Status
1	NETR.AI Private Limited	U72200CT2022PTC012901	15.03.2022	Dr. Gagan Raj Gupta	The initiative focuses on advancing eye-care diagnostics by integrating multiple AI-driven screening tools, including AI-based Cataract Grading and AI Screening for Diabetic Retinopathy to enable early and accurate detection. It also includes a mobile-based vision testing application for easy community-level screening, a portable fundus camera to capture retinal images in remote or rural settings, and an AR/VR-based visual field testing system for Glaucoma detection. Together, these solutions aim to make eye screening more accessible, affordable, and efficient for all.	TRL 4-6
2	J Leenus Private Limited	U29200CT2022PTC 012982	31.03.2022	Dr.Jose Immanuel	The project aims to provide safe and clean drinking water to all by extracting potable water from brackish and saline water sources using a renewable energy-powered purification system. The solution is designed to be cost-effective, sustainable, and accessible, ensuring that even remote or underserved communities can obtain affordable drinking water without relying on conventional electricity or high operational expenses.	TRL 4-6
3	C Gel 07 Pvt. Ltd.	U52609CT2022PTC012930	24.03.2022	Dr.Suchetan Pal	The project focuses on developing microneedles made from glucose-responsive materials, designed to enable painless and efficient monitoring. These microneedles will be integrated with a real-time glucose sensor that continuously measures blood glucose levels (BGL) and transmits the data to a connected device or smartphone, providing convenient, accurate, and non-invasive diabetes management.	TRL 4-6
4	Viswaprayag Pvt. Ltd.	U72900CT2022PTC013560	04.08.2022	Dr. Balaprakash Rao Killi	This startup focuses on developing a Blockchain-enabled Digital Identity and Dynamic KYC Authentication System, designed to provide secure, tamper-proof, and easily verifiable identity management. By enabling real-time KYC updates and decentralized data control, the solution reduces repetitive verification processes, enhances user privacy, and streamlines onboarding for banks, financial institutions, and digital service platforms. This approach improves efficiency, strengthens security, and supports seamless digital trust across services.	TRL 4-6
5	Nitminer Tech Pvt. Ltd.	U72900CT2022PTC013375	24-06-2022	Dr. Sangharatna Godbole	This startup focuses on Smart Cleaner, an automated system designed to detect, analyze, and clean smart contracts by identifying vulnerabilities, redundant code, and security loopholes. The solution enhances the safety and efficiency of blockchain-based applications by ensuring that deployed smart contracts remain optimized, secure, and tamper-resistant. By automating the maintenance process, Smart Cleaner reduces manual auditing efforts, minimizes risks, and improves overall contract performance.	TRL 7-9
6	Whitenet Explorer Pvt. Ltd	U72900MH2022PTC389261	25-08-2022	Dr. Somanth Tripathy	This startup focuses on collaborative learning-based fraud detection for FinTech platforms, enabling multiple financial institutions to jointly train models and share intelligence without compromising data privacy. By leveraging secure federated learning and AI-driven anomaly detection, the system identifies suspicious patterns in transactions in real time. This approach improves fraud detection accuracy, strengthens risk mitigation, and enhances trust across digital financial ecosystems.	TRL 4-6

7	Blocfare Pvt. Ltd	U72900CT2022PTC013636	30-08-2022	Dr. Ashok Kumar Das	This startup focuses on the design and implementation of authentication and searchable encryption for blockchain-based FinTech applications, enabling secure data storage and efficient retrieval without exposing sensitive information. By integrating strong cryptographic authentication with privacy-preserving searchable encryption, the system ensures that users and institutions can verify identity and query encrypted financial data safely. This enhances security, prevents data misuse, and supports trusted, scalable FinTech operations.	TRL 4-6
8	AI Vocab Pvt.Ltd.	U72900CT2022PTC013927	22-11-2022	Dr. K.T Deepak	Artificial Intelligence Efficient AI Models for Fintech Applications The company Vocab.AI works on the speech and text analytics module for limited vocabulary in Indian English and Hindi for specific business use cases. Industry Collaboration with Wyzminds and funding support of INR 55 Lakhs. Implemented voice analytics module in the Vidya Samiksha Kendra Project in CG, automating the tele-calling responses for efficiently recommending actionable insights.	TRL 7-9
9	Hajo Pvt.Ltd.	U74999CT2022PT013080	22-04-2022	Dr.Rajesh Jampa	The Wallet App is designed to offer a convenient and secure way for users to manage their expenses during trips. It allows users to sync their contacts, add friends to trip budgets, and facilitates seamless payments.	TRL 4-6
10	Tadoba Solutions Pvt.Ltd.	U31900CT2018PTC008663	17-07-2018	Dr.Shravan Kumar Singh	working towards excellence in the electrical & electronics space, including designing, manufacturing, modifying, and services & maintenance of products of various kinds, including IoT-enabled precision agriculture, remote data monitoring & analysing system design & development using different technologies like LoRa, Raspberry Pi, FPGA, Firmware, and other energy-efficient Indigenous products (Water overflow controller, D2D smart switch, etc.) for personal and commercial use. We believe in pursuing business through innovation and technology.	TRL 7-9
11	Bhoomicam PVT. LTD.	U01100UP2022PTC172326	18-10-2022	Dr. Siddharth Khare	Bhoomicam's web-based vigilance application use satellite data to derive geographical elements such crop sowing, crop name, crop health, and yields. It also provides information about the location of land because verification of land is important before a bank agrees to provide a land loan to a farmer or anyone else.	TRL 7-9
12	Alfalgo PVT. LTD.	U62091HR2023PTC110755	17-04-2023	Dr.Raghav Talwar	To build a state-of-the-art no-code platform for retail traders to create, back-test, and deploy algorithmic trading bots for the retail traders in the segment of Indian equities and derivatives (futures and options).	TRL 7-9
13	Stella Next Technologies Pvt. Ltd.	U62099KA2023PTC178675	15-09-2023	Dr. Ramesh Babu	Blockchain based healthcare funding and Seamless Medical Claim Settlements and Reimbursement through Data Locker A blockchain-based healthcare funding system ensures transparency, traceability, and security in financial transactions. Seamless medical claim settlements and reimbursements are enabled through a secure Data Locker, which stores patient records and billing data immutably. This streamlines approvals, reduces fraud, and accelerates payouts, benefiting patients, insurers, and healthcare providers alike.	TRL 4-6
14	K-Means Technologies Pvt. Ltd.	U62091AS2023PTC025722	05-02-2024	Dr. Debojit Boro	An application platform for cold storage service of perishable food items for the rural street vendors of Guwahati, Assam” under the Tribal Area Sub plan (TSP). This project aims to address the storage challenges faced by rural street vendors in Guwahati, Assam, by implementing a point-based cold storage facility accessible through a user-friendly smartphone application. By reducing perishable food wastage, improving vendor income, and providing easy access to storage, the initiative seeks to enhance livelihoods and promote sustainability in the agricultural sector.	TRL 4-6

15	Digiride Technologies Private Limited	U62013MZ2024PTC013676	09/04/2024	Dr. Lalhruaizela,	“Economic Optimization Platform for Public Transport System of Mizoram” under the Tribal Area Sub plan (TSP) This project aims to develop a user-friendly app facilitating seamless access to public transport, incorporating real-time updates and taxi requests. Safety enhancements will be implemented through MIRSAC data, IoT monitoring, and user-driven updates, incentivizing timely information sharing. Additionally, it will enable secure electronic payments, promoting cashless transactions for public transport fares. With local language support in Mizo, the app ensures inclusivity and cultural sensitivity. Utilizing data insights, intelligent recommendations will optimize routes and deployments in collaboration with government agencies.	TRL 4-6
16	Digimed Solutions Private Limited	U62099MZ2024PTC013684	09/04/2024	Dr. K Vanlalawmpuia	This project aims to develop a mobile application featuring an AI/ML recommendation system, enabling secure management of health profiles and ailment descriptions in Mizo or English. It provides AI-driven suggestions for matching users with doctors, hospitals, and pharmacies, incorporating details like costs, services, distance, and reviews. Users can search for healthcare services, book appointments, and make consultations, with seamless transactions facilitated by an E-payment system. By supporting the Mizo language in the interface and sharing aggregated citizen health data trends with government agencies, the project enhances accessibility and informs health policy formulation.	TRL 4-6
17	Arbovine Pvt. Ltd.	U62090AR2024PTC014111	11/04/2024	Dr. Marpe sora	This project aims to create an online marketplace dedicated to Mithun trading, expanding market reach for farmers. It will feature a secure registration and verification process to authenticate farmers. Detailed listings of Mithun will offer comprehensive information to potential buyers, while transparent pricing mechanisms will promote trust and fairness. By integrating multimedia support, negotiation, bidding features, and digital payment options, the platform enhances the trading experience for both buyers and sellers. "Development of the Online Mithun Trading Platform for Arunachal Pradesh" under the Tribal Area Sub plan (TSP) This project aims to create an online marketplace dedicated to Mithun trading, expanding market reach for farmers. It will feature a secure registration and verification process to authenticate farmers. Detailed listings of Mithun will offer comprehensive information to potential buyers, while transparent pricing mechanisms will promote trust and fairness. By integrating multimedia support, negotiation, bidding features, and digital payment options, the platform enhances the trading experience for both buyers and sellers."	TRL 1-3
18	Mindmateria Private Limited	U63119CT2024PTC015792	10/02/2024	Dr. Raghavender Medishetty	Design and Implementation of P2P Online Artwork Marketplace. A Peer-to-Peer Online Artwork Marketplace enables direct interaction between artists and buyers, eliminating intermediaries. It ensures secure transactions, transparent ownership, and fair pricing. The platform supports digital and physical art, featuring smart contracts for ownership transfer, integrated payments, and artist portfolios, empowering creators and enhancing global art trade accessibility.	TRL 4-6

19	Preciagri Private Limited	U01119MZ2024PTC013709	19.12.2023	Dr. Chaitali Koley Dr. Sushanta Bordoloi	This project aims to develop fintech solutions tailored for smart farming in Mizoram, encompassing comprehensive data on land information, seed details, loans, and market insights. It endeavors to integrate cost-effective real-time sensors for monitoring environmental and field conditions, enhancing precision agriculture practices. Through rigorous testing and calibration of prototypes, including exploration of solar-powered charging options, the project aims to ensure reliable sensor functionality. Additionally, it aims to establish wireless communication links for efficient data collection, with a specific focus on optimizing oilseed cultivation in Aizawl.	TRL 4-6
20	Recogx private Limited	U62099CT2023PTC015463	18/June/2024	Mr.Sudeep ranjan sahu	providing ai based features to project vsk(a platform where every education related details are managed and showcased of state of chattisgarh) which was recently appreciated by department of education govt of India. Now we are planning to implement it in national level vsk programme where our work will be to implement the ai based features in the panel	TRL 7-9
21	EVXplorer Private Limited	U72900BR2021PTC055684	1.02.2023	Dr. Arijit Mondal	A smart revenue optimization framework enables efficient on-demand scheduling and routing of heterogeneous electric vehicles (EVs). By leveraging real-time data and AI algorithms, it maximizes fleet utilization, minimizes energy costs, and adapts to varying demand. This dynamic system enhances profitability, sustainability, and service reliability in EV-based transportation networks.	TRL 7-9
22	YAIPHA AI Private Limited	U63999MN2024PTC015070	14.11.2023	Dr. Benjamin Shimray	This project aims to bridge healthcare gaps in remote tribal areas of Manipur through a comprehensive mobile health (mHealth) solution. It includes a telemedicine platform for remote consultations, IoT devices for health data collection, and a user-friendly health information portal. Additionally, medication delivery services, health education initiatives, and training for community health workers will be provided.	TRL 1-3
23	Lerom Private. Ltd.	U62099MZ2024PTC013702	14.11.2023	Dr. Morrel V L Nunsunga	The proposal aims to simplify agricultural trade by deploying a user-friendly app enabling communication between producers and resellers. It addresses payment and trust issues through e-payment and blockchain technology, while also incorporating features like vendor ratings and sentiment analysis for user feedback and policy-making.	TRL 7-9
24	BOHM Pvt Ltd.	ACI-0364	14.11.2023	Dr. Rinku Basumatry	This project aims to develop a user-friendly bilingual web portal containing comprehensive information on medicinal plants, including their Bodo and English names, properties, uses, and cultivation methods. It seeks to preserve and document the traditional knowledge of the Bodo community regarding medicinal plants for future generations. Additionally, the project aims to promote sustainable practices in cultivating and harvesting medicinal plants to support conservation efforts. By creating a bilingual platform, the project intends to enhance accessibility and reach for individuals from diverse linguistic backgrounds.	TRL 1-3
25	RIPE WATCH PRIVATE LIMITED	DIPP178676 U62090NL2024PTC013976	14.11.2023	Dr. Lithungo K Murry	A drone-based system integrating a camera and ethylene gas sensor to monitor pineapple ripeness. Using image analysis and gas detection, the system predicts the optimal harvest time, improving fruit quality and enabling efficient crop management	TRL 1-3

26	PUITU TECH PRIVATE LIMITED	U62013MZ2025PTC013775	14.11.2023	Dr. Vanlalmuansangi Khenglawt	A web and mobile-based platform designed to connect unorganised workers in Mizoram with job opportunities. The system features user roles for job posters and workers, with core functions such as job posting, application management, worker profiles, real-time notifications, and a rating system. An admin panel oversees platform activity and ensures smooth operation. The platform enhances accessibility, job consistency, and transparency for unorganised workers.	TRL 1-3
27	ZO GREEN TECH PRIVATE LIMITED	U62099MZ2024PTC013689	19.12.2023	Dr. R. Chawngsangpuui	An AI-powered soil monitoring system that delivers real-time data on soil conditions to support informed irrigation and fertilization decisions. The platform features automated alerts for threats like drought and soil acidity, and uses centralized AI analytics to predict crop yields and detect soil health decline. By enabling precision irrigation and AI-driven crop management, the system promotes sustainable agriculture and resource-efficient farming in Mizoram.	TRL 1-3
28	ARDKHA SOLUTIONS PRIVATE LIMITED	U62090UT2025PTC018658	29.01.2024	Prof. Harshit Sosan Lakra	A comprehensive platform to empower tribal communities through the integration of Indigenous knowledge, technology, and market access. Key developments include a mobile app and website, capacity-building modules, and a 10-acre infrastructure for demonstration projects in Jashpur District. The initiative promotes sustainable livelihoods, connects farmers to carbon credit markets using international standards, and leverages local language and traditional practices to foster inclusive, climate-resilient development.	TRL 1-3
29	TRIPURESWARI CRAFT PRIVATE LIMITED	U73100TR2025PTC014517	07.03.2024	Dr. Somen Debnath	Blockchain-based decentralized marketplace to support Tripura's handloom and bamboo artisans, ensuring transparent, traceable, and fair trade. Smart contracts automate secure payments, while digital identities increase artisan visibility. An AI-powered recommendation system offers personalized suggestions, enhancing buyer-artisan engagement. The project also includes extensive artisan outreach and skill development, empowering over 100 tribal artisans through surveys and collaboration.	TRL 1-3
30	NAGACONNECT SERVICES PRIVATE LIMITED	U78100NL2025PTC014042	24-01-2025	Dr. Chenlep Yakha Konyak	This project aims to develop an inclusive Application Programming Interface (API) incorporating the Khasi Language, bridging communication barriers between online financial service providers and rural communities. By implementing digital literacy initiatives and expanding service offerings, it seeks to enhance accessibility and understanding of online financial services. The project is committed to long-term sustainability by empowering the Khasi-speaking community to navigate and leverage the evolving digital landscape for their benefit.	TRL 1-3
31	Tech Ensurex Private Limited	U62099HR2025PTC130790	16-04-2025	Dr. Mrinal Pandey	The project aims to develop an efficient and transparent Medical Insurance Claim Settlement system using Blockchain and Artificial Intelligence under MRU Haryana. By creating a decentralized end-to-end platform for patients, hospitals, and insurance companies, the model ensures secure, tamper-proof medical records and automated claim verification. This approach significantly reduces turnaround time, manpower involvement, and overall processing cost, while improving accuracy, trust, and transparency in the insurance claim settlement process.	TRL 9
32	DAIDO CONCRETE PRIVATE LIMITED	U23955MZ2024PTC013700	16-04-2025	DR. RICKY IALTHAZELA	A Fintech Application for Cost Benefit Portfolio Suggestion Regarding Locally Available Aggregate by Quality Assessment and Modified Concrete Made of Recycled Waste and Bamboo as Partial Replacements Versus Traditional Concrete
